## SOIL CONDITIONERS

We are one of the very first wholesale distributors of

# KRILIUM

The original Soil Conditioner developed exclusively by MONSANTO CHEMICAL COMPANY — tested for years by soil scientists in all parts of the United States.

KRILIUM is a syntethic chemical which quickly turns hard clay and similar problem soils into loose, crumbly particles ranging in size from a pinhead to a pea. The result of this action is entirely mechanical — KRILIUM has no fertilizer nor plant food value.

Don't accept any untested "just-as-good" products that are being rushed to the market merely to capitalize on the wide acceptance of KRILIUM, the ORIGINAL soil conditioner.

The Merloam Formulation of KRILIUM, the one specially prepared for gardens and lawns is now available for immediate shipment as follows:

	Dealer Price	Suggested Retail
*1-lb. sifter top (48 to Case).....	\$54.08 Case	\$1.69 Each
5-lb. Canisters (6 to Case).....	27.80 Case	6.95 Each
*(Packed 4 Cartons of 12-1 lb. canisters each.)

1 Gallon.....	4	1.20 Ea.	2.00 Ea.

## FOR LAWNS

### End-o-Weed

The new selective weed killer that sprays weeds out of grass.

	Pkgs. Per Case	Dealer Price	Suggested Retail
1/2 Pt. Cans.....	24	\$14.16 Case	\$1.98 Ea.
1 Qt. Cans.....	12	19.44 Case	2.69 Ea.
Side Sprayers.....	24	4.56 Case	.29 Ea.

### END-O-WEED CRAB GRASS KILLER

	Pkgs. Per Case	Dealer Price	Suggested Retail
7 Oz.....	24	\$14.16 Case	\$0.98 Ea.
22 Oz.....	12	18.60 Case	2.59 Ea.

### WEEDICIDE 32 LAWN WEED KILLER

Contains: 3 Lbs. 2, 4-D Amine Salt per gallon; 2 Lbs. 2, 4-D Acid Equivalent per gallon.

	Coverage	No. Per Case	Dealer Price	Suggested Retail
1/2 Pt. Bottles....	1/4 Acre	24	\$14.40	\$0.98
1 Pt. Bottles....	1/2 Acre	12	12.60	1.75
1 Qt. Bottles....	1 Acre	12	21.45	2.98

### DUPONT KARMEX (Weed Killer)

2.4D Weed Killer in convenient form, one tablet to 2 quarts water. Two tablets per gallon.

	No. Per Case	Dealer Price	Suggested Retail
25 Tablet Bottle....	72	\$43.20 Case	\$0.98 Ea.
100 Tablet Bottle....	24	51.00 Case	3.40 Ea.

## CRAB GRASS KILLER

### CRAB-NOT

"Selective"

### CRABGRASS AND CHICKWEED KILLER

CRAB-NOT containing "POTASSIUM CYANATE," a new NON-POISONOUS Weed Killer which readily controls crabgrass and chickweed in lawns with little or no damage to desirable turf grasses.

CRAB-NOT readily combines with "2-4-D" for control of broadleaf weeds and is available in packaged form "with" or "without" 2-4-D.

### CRAB-NOT STANDARD FORMULA

Contains 86% "P. C."  
Plus Wetting Agent

	Pkgs. Per Case	Dealer Price	Suggested Retail
4 Oz.....	72	\$ 7.20 Doz.	\$ 1.00 Ea.
16 Oz.....	12	21.24 Doz.	2.95 Ea.

Foot Pump.....	1	11.25 Ea.	15.00

### CYANOGENAS G-FUMIGANT

For fumigating warehouses, greenhouses, mills, etc.

	No. Per Case	Dealer Price	Suggested Retail
5 Lb. Cans.....	20	2.57 Ea.	3.85
25 Lb. Cans.....	1	9.65 Ea.	12.90
100 Lb. Drums.....	1	24.80 Ea.	31.00

### CYANOGENAS ANT KILLER

	No. Per Case	Dealer Price	Suggested Retail
4 Oz. Cans.....	12	2.90 Doz.	.40 ea.

### D-CON RID-X

A product developed to destroy waste, deodorize, clean and sanitize outdoor toilets, cesspools and septic tanks. The Rid-X action causes great amounts of bacteria to be formed which goes to work immediately to eat away the bulk in the disposal units.

	No. Per Case	Dealer Price	Suggested Retail
1 Lb. Box.....	12	\$13.56 Case	\$1.69

### D-CON ROACH PRUFE

A newly developed sure kill for roaches, silver fish, etc. To be brushed on — not sprayed. No stain — no odor — brush with each bottle.

	No. Per Case	Dealer Price	Suggested Retail
1 Pint Bottle.....	12	\$15.12 Case	\$1.89

### D-CON MOUSE AND RAT KILLER

This product is guaranteed to kill rats and mice because it contains Warfarin combined with Lurex. Warfarin is a new special product of the coumarin group, and kills rodents in 3 to 5 days by inducing internal hemorrhage.

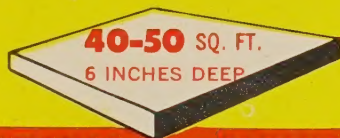

Lurex is a new special patented rat attractant which assures bait consumption continuously without bait shyness. The basic ingredients of D-Con are tasteless, odorless and does not induce sudden pain. Rat and mouse colonies are wiped out entirely.

	No. Per Case	Dealer Price	Suggested Retail
8 Oz. D-Con Concentrate, Makes 6 pounds of bait.....	12	\$24.00	\$2.98
1 Lb. D-Con Ready-Mix Bait.....	12	13.56	1.69
4 Oz. D-Con Mouse - Prufer, Ready for use, Household Package.....	36	7.20	.89

## What Merloam is and How it Works

Krilium is the original chemically-made "resin," developed by Monsanto, which acts on soil like the natural gums produced by composts and manures.

MERLOAM is a special formulation of Krilium developed for home gardeners. It contains additional ingredients which keep the Krilium dry and free-flowing and make it easier to mix in the right amount of conditioner on a given area of soil.

Soil contains varying amounts of three kinds of materials: clay particles, fine silt, and grains of sand. Krilium "bonds" the clay particles into tiny balls or "aggregates." That's why hard-packed clay turns into loose, easy-to-work soil when mixed with MERLOAM. Hard, lumpy soil becomes a mass of loose aggregates that range in size from a pinhead to a pea.

MERLOAM will improve almost every "problem" soil. These include soils that are too hard to spade for gardening or too crusted for grass seed to sprout; soils that run off under rain and crack in the sun; soils that are so dry that sprinkling won't wet them beneath the surface.

## Why Mixing is Important

Tiny chemical "bonds," too small to be seen even through a microscope, must first contact all the minute clay particles. These "bonds" must be set up *inside and throughout* the hard lumps of soil. That's why the mixing in must be as thorough as possible.

The conditioner must get *into* the soil. This is why just spraying a conditioner, dissolved in water, can't work. If soil is crusted and hard—so that rain water or sprinkling won't penetrate—a solution acting on the surface only, could "freeze" the soil surface in its crusted condition. And even if the soil permits liquid to soak down through the crust—the active soil conditioning material is absorbed out of the solution by the soil surface as the solution passes through! Hard soil **MUST** be broken up and stirred thoroughly so that the soil conditioner can get inside all the hard lumps. This mechanical breaking up gets the soil conditioner into hard clays which a liquid could not penetrate. A treated plot of soil will remain a fine, loose, porous seedbed—despite hard rain and hot sun.

Monsanto's Krilium *could* be chemically prepared in liquid form. But even though pound-for-pound Krilium is the most efficient soil conditioner yet discovered—spraying a liquid over hard soil would only give a thin layer of conditioned soil surface. Mixing in is essential to improve the soil deep down around the plant roots—where loose soil, good water percolation and breathing space for roots is most important.

Although a liquid soil conditioner might seem to "go farther" and "appear" to treat the soil, it would not do a thorough job of conditioning. *Mixing* breaks up the hard soil; MERLOAM *keeps* that loose, "loamy" consistency.

## How Much Soil Merloam will Treat

The MERLOAM formulation has been specially developed for home use. There

are other formulations of Krilium for professional use in greenhouses and formulations for highway engineers to use in erosion control. Each has been prepared for maximum effectiveness and ease of application. For some uses, tiny amounts of dispersants are incorporated to make spreading easier; for other uses a small percentage of wetting agent is necessary for most rapid formation of soil crumbs; dyes are added to some formulations to distinguish the soil conditioner from fertilizer when the two are used together. The dyed formulations enable the user to see how well he has mixed the soil conditioner with other materials, such as white lime or fertilizer.

Monsanto recommends 5 lbs. of MERLOAM formulation for treating 40 square feet of garden soil to a *six inch depth*; or 5 lbs. to treat 80 square feet to a *three inch depth*. These amounts will treat the hardest crusted soil. For poor soils — not badly crusted — 5 lbs. will treat up to 50 square feet to a *six inch depth*; up to 100 square feet to a *three inch depth*. Soils vary greatly in different areas. The recommended amounts of MERLOAM are on the "safe side" ... based on extensive tests by over 80 scientific cooperators in universities, agriculture experiment stations and commercial firms.

The depth of treatment must be judged by the user. Six inch deep treatment is best for general gardening where deep spading would turn up untreated soil in succeeding years. Three inch deep treatment may be perfectly satisfactory for shallow-rooted plants such as lettuce, peas or spinach. A simple raked-in surface treatment — to a half-inch depth — will aid grass seed germination when putting in lawn. For rake-in surface treating, 5 lbs. of MERLOAM will treat 480 to 575 square feet to a half-inch depth. For establishing lawns or gardens — the user must judge how deep he wants his soil to be conditioned.

## *How Merloam Helps Gardening*

MERLOAM treatment turns dense, hard soils into loose, spongy soil. Plant roots can grow and breathe. Water can percolate down to the roots. The treated soil becomes so *easy* to spade and cultivate! Plants can more easily break through loose, porous soil — so seeds germinate more readily. Good root growth takes place in the treated soil because root tendrils do not have to struggle through hard-packed soil.

Fertilizers appear to work more effectively in the treated soil. MERLOAM treatment improves the environment for the plants and for the highly important soil bacteria. MERLOAM treatment does all that is structurally possible to turn a problem soil into a good soil for growing.

## *Good Food as well as Good "Housing" Essential*

A plentiful supply of plant food is necessary to obtain good yields. MERLOAM treatment gives growing plants a good soil to live in — but it does not feed the plant. Fertilizers are needed to nourish plants. Consequently, when MERLOAM is used, the regular fertilizers should be used too. Plants cannot thrive in a light airy soil, even with plenty of water, if there is not enough plant food present in the soil. For the greatest success with your garden, be sure to improve the soil structure *and* use enough fertilizer to feed the growing plants.

\*Krilium was first announced on December 29, 1951 at a meeting of the American Association for the Advancement of Science. On that date Monsanto Chemical Company made the first public announcement that it had developed a chemical soil conditioner: Krilium.

This announcement received wide public acclaim. Now Krilium is available for your use...the MERLOAM formu-

lation for gardens and lawns.

Krilium was studied and tested as far back as the summer of 1947. It is the only soil conditioner that has been tested for over three years...and Monsanto is still researching to learn all the facts about this altogether new method of turning hard clay into good soil. There is only one MERLOAM formulation of Krilium.

# INSECTICIDES & FUNGICIDES

## ACME ALL AROUND SPRAY

A complete, modern carefully formulated dust for flowers, shrubs, vegetables and fruit trees.

Contains — 5% DDT — .75% Rotenone — 20% Sulphur and 15% Dithiocarbamate.

For spraying — 1 lb. to 12 gallons water.  
For dusting — Use as is.

	Pkgs. Per Case	Dealer Price	Sug- gested Retail

Ton Lots (100 Lb.  
Bags Only) ..... 56.00

## FERTILIZERS

### HOU-ACTINITE

ALL-ORGANIC 6-3-0

An all-organic fertilizer comparable with Milorganite. Not granulat like Milorganite but works well through a spreader. Consistency very small particles about 1/8" in diameter down to very fine dust. Users have had quicker acting than with Milorganite due to its fineness.

Packed in 80-lb. attractively printed white paper bags. Full directions printed on the bag.

	Dealer Price	Suggested Retail
80-lb. Bags. ....	\$2.25 Ea.	\$3.25 Ea.
Ton lots — 25 80-lb. bags, \$55.00 per ton.		

(Ask for descriptive literature)

### HYPONEX

(Plant Food) Analysis 7-6-19

Makes ideal liquid plant food — one teaspoonfull makes one gallon — Grows plants in soil, sand or water.

	Packages Per Case	Dealer Price	Suggested Retail Price
1 Oz. Pkts (Makes 6 Gallons) ....	72	\$4.80 Cs.	\$ .10 Ea.
3 Oz. Cans (Makes 18 Gallons) ....	36	6.00 Cs.	.25 Ea.
